

# Activ8me Business Hub

A smarter internet solution  
for remote business

Maintaining business productivity by reserving and prioritising internet data for business-critical tasks.

---

## Communications Challenge

- Limited to no mobile coverage or fixed phone line services.
- Cost of deploying infrastructure in remote locations.
- Retaining enough internet data for business-critical online tasks.
- Family, employee and visitor isolation.

---

## Benefits

- Reliable, affordable communication solution to any Australian location.
- Internet data reserved and prioritised for business-critical online tasks, by separating business from personal use.
- Employee and visitor Pay As You Go Public WiFi options.
- WiFi calling and/or IOT capability.
- Easy DIY set-up, including ability to extend WiFi coverage.
- Improved employee wellbeing and retention.

# Activ8me Business Hub

## The affordable new solution for maintaining business productivity

Our next-generation Activ8me Business Hub offers your remote business a smarter, more affordable way to manage your data and networks. This one simple plug-and-play internet router replaces the need for multiple router devices in small office/home space. Plus, if you need to extend the WiFi coverage, we offer Activ8me Do It Yourself (DIY) antenna kits, containing full installation instructions. The Activ8me Business Hub is one more way we can offer your business a quality, cost effective end to end service from design and connection through to maintenance, support and remote monitoring.
