

Key Facts Sheet: NBN Services

National Broadband Network Satellite

The below information relates to NBN Satellite services. The service you receive at your premises is determined the technology the nbn provide to your address.

Internet Data Plan Information

15GB & 45GB Peak Plans Good For:	60GB & 90GB Peak Plans Good For:	90GB to 150GB Peak Plans Good For:
Browsing, banking, social media.	Browsing, social media, light standard definition streaming	Browsing, social media, medium level standard definition streaming, education, home office

Speed Pack Information

Standard Speed	Sonic Speed
<p>NBN 12 speed</p> <p>The basic NBN speed. This speed is good for browsing, email & social media. Typically, good for use by 1 to 2 people</p>	<p>NBN 25 speed</p> <p>This speed is good for browsing, social media and streaming video. Typically, good for use by 2 to 3 people</p>

These packs respectively use nbn speed tiers 50/20Mbps (Supersonic) and 100/40Mbps (Hypersonic), which are theoretical maximum speeds that will not be achieved in operation. Speeds achieved at each premises will vary and be dependent on a number of factors including line quality, equipment in use, source of the download, number of users using the network and many more.

Standard speed has the capability of streaming video services such as Netflix and ABC iView, however the speed available will only be able to support one stream and minimal other activity. NBN Sky Muster satellite service may not be appropriate for applications that require low network latency such as online gaming and share trading. These services are known to perform poorly (or not at all) on satellite broadband services.

Usage Information

A record of your account usage can be viewed by logging into the 'My Account' section of the Activ8me website at www.activ8me.net.au. Usage information can take up to 24 hours to update.

Once your monthly internet data limit is reached, your connection speed will slow to a maximum of 128kbps/128kbps for the remainder of your billing month.

Factors affecting speed

Speeds listed are typical evening speeds across our network. Speeds to individual premises may vary and can be affected by the volume of traffic on the general internet, the number of users online at your house, your equipment, software, and the source of your download.

Medical and security alarms

Activ8me do not support medical alarms or security alarms. If you require these devices at your address, we recommend using a provider that supports them such as Telstra.
